

PSI Career Mail

PSI Career Center – **Training. Career. Happiness.**

Dear reader

This is the last career mail I will send out.

I would love to continue collecting articles, advertisements and content for the career mail, but I have decided to leave PSI by end of June 2022. Therefore, it is time to say goodbye

Thank you very much for your interest and your engagement for the topic of career development, for sharing interesting news and (job) advertisements and for being a great audience.

As soon as my successor has started in his/her position as head of PSI Career Center, she/he will decide whether to continue with this newsletter. Maybe it will be updated, receives a new layout, some additional content or a completely new format. Who knows...

Thank you very much, take care and enjoy reading,
Yvonne

Let's talk about...

... One Young World Switzerland Caucus 2022

Shape your organization to be Net-Positive - Be part of the One Young World Switzerland Caucus 2022!

On **29th and 30th of June**, in St Gallen, the One Young World Switzerland Caucus is bringing together passionate young leaders from across Switzerland to 'Reshape business today, for a brighter tomorrow'. We will hear from inspirational speakers and delegates who are discussing what a 'net-positive' future looks like in climate, nature and inequality, and taking action for how we can collaborate to move towards this. Be part of the discussion and part of the community that will drive this forward in Switzerland – and join us!

Apply here for a ticket! And if you are interested in sponsoring opportunities, then reach out to @Jess Jones.

... Act as expert with in-depth experience

Innosuisse, the Swiss Innovation Agency is expanding its funding offer. For the evaluation of new funding applications, we need additional experts with in-depth experience from different areas at the **interface between research and industry**.

Innosuisse attaches a lot of importance to a diverse representation of its expert pool in terms of gender, ages, languages and regions. In particular Innosuisse is seeking to reinforce the female power in its expert pool to ensure that funding decisions for the innovations of tomorrow are not just taken based on the views of a subset of society.

If you match with one of the target profiles published on our website (<https://www.innosuisse.ch/inno/en/home/about-us/organisation/experts/election-experts.html>) you would be an excellent candidate and we would highly appreciate your application.

More details here: <https://www.innosuisse.ch/inno/en/home/about-us/organisation/experts/election-experts.html>

Note that the **application deadline** will be extended to **23 June 2022**.

... Join ETH Zurich's Postdoc Career Week

20 June - 29 June 2022

Place: mostly online via Zoom (except 2 sessions in person)

Schedule: see here

Registration: for [ETH Postdocs](#) / for [non-ETH Postdocs](#)

The postdoctoral phase can be challenging with regard to career planning. Do you want to continue in academia? What does it take to become a professor - and are there other options? Do you want to change into industry, public administration or another sector? How can your academic skills be transferred into other domains?

The Postdoc Career Weeks may help answer some of these questions for you, and a few more. It consists of presentations, workshops, and discussion panels and features a host of academic and non-academic guests who will share their experiences over the course of two weeks at the end of June.

... Materials for CO2UNDown – With innovative materials to CO2 neutrality

29 June 2022, Empa-Akademie Dübendorf

Buildings, industrial plants, roads, cars, electronic gadgets and, and, and. Our modern lifestyle consumes vast amounts of energy and materials. But climate change and the resulting increasing risk of natural hazards, population growth and diminishing resources are gradually leading to a rethink. We urgently need new technologies and materials to reduce our carbon footprint and achieve the climate goals we have set.

The aim of the "Technology Briefing" is to inform industry and trade about current practical issues and to offer possible answers. At this event, Empa and selected industry representatives explore the question of how innovative

materials can be used to achieve CO2 neutrality and thus the climate targets defined by the federal government.

In addition to providing information, the event also serves as an opportunity to exchange experiences with experts and to identify potential for cooperation and innovation.

PSI Career Mail

The PSI Career Mail addresses mainly PhD and Postdocs. It shares news about job opportunities (academia and industry), career & networking events, ideas regarding your career development and others.

The PSI Career Mailing is sent out about once a month or upon need.

To unsubscribe from this list, please click on this [email](#).

Subscriptions can also be terminated by logging in to [Sympla](#), clicking on "subscription" or "Abbestellen" on the left hand side and following the respective instructions.
